

Package ‘cancerdata’

October 12, 2023

Type Package

Version 1.38.0

Date 2011-10-26

Title Development and validation of diagnostic tests from
high-dimensional molecular data: Datasets

Author Jan Budczies, Daniel Kosztyla

Maintainer Daniel Kosztyla <danielkossi@hotmail.com>

Description Dataset for the R package cancerclass

Depends R (>= 2.10.1), Biobase

License GPL (>= 2)

biocViews CancerData, MicroarrayData

cancerdata-package *Development and validation of diagnostic tests from high-dimensional molecular data: Datasets*

Description

This package contains dataset for the R package cancerclass.

Details

Package: cancerdata
Type: Package
Version: 1.1.0
Date: 2010-10-26
License: GPL (>=2)

Author(s)

Jan Budczies <jan.budczies@charite.de>, Daniel Kosztyla <danielkossi@hotmail.com>

```

VEER *Breast cancer gene expression data (van't Veer)*

Description

Gene expression data from the breast cancer microarray study of van't Veer et al. [1]. The data set VEER includes gene expression values of 24481 genes in 78 tumor samples. The data set VEER1 is a filtered version [2] of VEER including gene expression values of 4948 genes in 78 tumor samples).

Usage

```
data(VEER)
data(VEER1)
```

Value

Data and annotations are organized in a ExtresenSet of the package Biobase.

|--------|--|
| VIJVER | <i>Breast cancer gene expression data (Vijver)</i> |
|--------|--|

Description

Gene expression data from the breast cancer microarray study of Vijver et al. [1]. The data set VIJVER includes expression values of 24481 genes in 295 tumor samples. The data set VIJVER1 is a filtered version of VIJVER [2] including expression values of 4948 genes in 295 tumor samples.

Usage

```
data(VIJVER)
data(VIJVER1)
```

Value

Data and annotations are organized in a ExtresenSet of the package Biobase.

YOUNG

Breast cancer gene expression data (van't Veer, young patients)

Description

Gene expression data from the breast cancer microarray study of van't Veer et al. [1]. The data set VEER includes gene expression values of 24481 genes in 19 tumor samples. The data set VEER1 is a filtered version [2] of VEER including gene expression values of 4948 genes in 19 tumor samples).

Usage

```
data(YOUNG)
data(YOUNG1)
```

Value

Data and annotations are organized in a ExtressenSet of the package Biobase.

| | |
|--------|---------------|
| YOUNG | ExpressionSet |
| YOUNG1 | ExpressionSet |
