

# The `epcqr` package\*

David Wedekind, Paul Kantiem, Wolf Müller  
epc-qr-code@proton.me

April 12, 2024

## 1 Introduction

This package is a wrapper for the `qrcode` package. It offers an easy way to generate valid EPC QR codes by providing syntax and validity checks, e.g. verifying the correctness of the IBAN.

## 2 Usage

`\epcqr` The `\epcqr` command uses the L<sup>A</sup>T<sub>E</sub>X-builtin key-value system to parse the user input. There are 3 mandatory keys to produce a valid EPC QR code: `name`, `iban` and `amount`. The following code produces a minimal example.

```
\epcqr{
  name=Wikimedia Foerdergesellschaft,
  iban=DE33100205000001194700,
  amount=123.45,
}
```

Note, that the maximum payload is limited to 334 bytes. More specific information can be found in the guidelines<sup>1</sup>. As of now the user is responsible to stay within this limit, if they are using characters which are not part of following character set: (As specified under section 1.4 in the Customer-to-PSP Implementation Guidelines<sup>2</sup>)

a b c d e f g h i j k l m n o p q r s t u v w x y z  
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z  
0 1 2 3 4 5 6 7 8 9

---

\*This document corresponds to `epcqr` v1.1, dated 2024-04-12.

/ - ? : ( ) . , ' +  
Space

Additionally to the mandatory arguments, the user can provide more information:

- bic** (Optional) The BIC code of the Beneficiary Payment Service Provider.
- name** (Mandatory) The name of the Beneficiary. Maximum length is 70 characters.
- iban** (Mandatory) The IBAN of the account of the Beneficiary
- amount** (Mandatory) Amount of the SEPA Credit Transfer in euro. Amount must be larger than or equal to 0.01, and cannot be larger than 999999999.99.
- reason** (Optional) Purpose of the SEPA Credit Transfer.
- ref** (Optional) The Remittance Information (a structured creditor reference code). Note: If a reference code is given **text** must be empty.
- text** (Optional) The Remittance Information (an unstructured text). Maximum Length is 140 characters. Note: If a text is given **ref** must be empty.
- information** (Optional) Additional information for the user. Maximum Length is 70 characters.

### 3 Options

Since this package is a wrapper for the `qrcode` package, all of its options can also be specified here using the `\qrset` command.

```
\begin{document}
  \qrset{height=5cm}%
  \epcqr{
    name=Wikimedia Foerdergesellschaft,
    iban=DE33100205000001194700,
    amount=123.45,
  }
\end{document}
```

Changing the level of the QR code does not have an effect, as EPC QR codes have a set level.
