LGchangeLog	<i>LimmaGUI Change Log</i>
-------------	----------------------------

---

## Description

Write as text the most recent changes from the limmaGUI package changelog.

## Usage

```
LGchangeLog (n=20)
```

## Arguments

`n` integer, number of lines to write of changelog.

## Value

No value is produced, but a number of lines of text are written to standard output.

## Author(s)

Gordon Smyth

**Description**

Graphical User Interface for the limma microarray package

**Usage**

```

## Arguments

<code>BigfontsForlimmaGUIpresentation</code>	If set to TRUE, larger fonts are used. However, some font sizes are not controlled by limmaGUI and so must be adjusted in the operating system, e.g. in the Control Panel in Windows under Display, Appearance.

### Details

This function launches a Graphical User Interface for the limma package by Gordon Smyth. The GUI uses Tk widgets (via the R TclTk interface by Peter Dalgaard) in order to provide a simple interface to the limma functions for linear modelling of microarrays and identification of differentially expressed genes.
