

# **citrusprobe**

April 16, 2019

---

`citrusprobe`      *Probe sequence for microarrays of type citrus.*

---

## **Description**

This data object was automatically created by the package AnnotationForge version 1.11.21.

## **Usage**

```
data(citrusprobe)
```

## **Format**

A data frame with 341730 rows and 6 columns, as follows.

|   |           |                              |
|---|-----------|------------------------------|
| <code>sequence</code>                     | character | probe sequence               |
| <code>x</code>                            | integer   | x-coordinate on the array    |
| <code>y</code>                            | integer   | y-coordinate on the array    |
| <code>Probe.Set.Name</code>               | character | Affymetrix Probe Set Name    |
| <code>Probe.Interrogation.Position</code> | integer   | Probe Interrogation Position |
| <code>Target.Strandedness</code>          | factor    | Target Strandedness          |

## **Source**

The probe sequence data was obtained from <http://www.affymetrix.com>. The file name was `Citrus\_probe\_tab`.

## **Examples**

```
citrusprobe  
as.data.frame(citrusprobe[1:3,])
```
