v1.3

**L^AT_EX support files for Softmaker
Baskerville Nova available at
<http://www.freefont.de>**

August 20, 2010

Package author:
Josef Kleber

This package offers L^AT_EX support files for the Softmaker Baskerville Nova fonts available at www.freefont.de in February 2010.

These support files were created with the `installfont` bash script, which is available in CTAN.

Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at www.freefont.de, as well as part of some font collections of [Softmaker](#).

1 Baskerville Nova (February 2010)

1.1 Package options

The font style file offers the following options:

1.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage[scaled=1.03,leading=1.05]{iceberg}`.

1.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where 1.0 means 100%.

1.2 The Font

First of all, you have to get the font. Download it for free at www.freefont.de or get it from [Softmaker](#). Copy the Postscript Type1 fonts `Baskerville-Nova-Regular.pfb`, `Baskerville-Nova-Bold.pfb`, `Baskerville-Nova-Italic.pfb` and `Baskerville-Nova-BoldItalic.pfb` to your local T_EX tree:

```
TEXMF:/fonts/type1/softmakerfreefont/BaskervilleNova/
```

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
6bn	m	n	Baskerville-Nova	OT1, T1, TS1
6bn	m	it	<i>Baskerville-Nova</i>	OT1, T1, TS1
6bn	m	sl	<i>Baskerville-Nova</i>	OT1, T1, TS1
6bn	m	sc	BASKERVILLE-NOVA	OT1, T1, TS1
6bn	b	n	Baskerville-Nova	OT1, T1, TS1
6bn	b	it	<i>Baskerville-Nova</i>	OT1, T1, TS1
6bn	b	sl	<i>Baskerville-Nova</i>	OT1, T1, TS1
6bn	b	sc	BASKERVILLE-NOVA	OT1, T1, TS1

1.3 Installation

The following steps will show you the installation in the case of MiKTeX. For another T_EX distribution please take a look in its documentation.

- get [baskervillenova.tds.zip](#)
- extract it in the main directory of your local T_EX tree

- update the FileNameDataBase (FNDB) in MiKTeX Settings or with `initexmf -u1` on the command line
- include the map file
 - run `initexmf --edit-config-file updmap`
 - add `Map baskervillenova.map` in the opening editor
 - save the file and close the editor
 - run `initexmf --mkmaps`

1.4 Usage

If you want to typeset your complete document with the font Baskerville-Nova simply add `\usepackage{baskervillenova}` to your preamble. If not, simply add another font package after `\usepackage{baskervillenova}`. You can switch to the font Baskerville-Nova with the command `\FFBaskervilleNova`, which is a shortcut for:

```
\fontfamily{6bn}\fontseries{m}\fontshape{n}\selectfont
```

¹for system-wide installations you have to add the `--admin` switch
