

**bonita.sty**

**v1.0**

**L<sup>A</sup>T<sub>E</sub>X support files for Softmaker Bonita  
available at  
<http://www.freefont.de>**

**September 6, 2010**

Package author:  
**Josef Kleber**

This package offers L<sup>A</sup>T<sub>E</sub>X support files for the Softmaker Bonita font available at [www.freefont.de](http://www.freefont.de) in September 2010.

These support files were created with the `installfont` bash script, which is available in CTAN.

## Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at [www.freefont.de](http://www.freefont.de), as well as part of some font collections of [Softmaker](#).

## 1 Bonita (September 2010)

### 1.1 Package options

The font style file offers the following options:

#### 1.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage[scaled=1.03,leading=1.05]{iceberg}`.

#### 1.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where 1.0 means 100%.

### 1.2 The Font

First of all, you have to get the font. Download it for free at [www.freefont.de](http://www.freefont.de) or get it from *Softmaker*. Copy the Postscript Type 1 font `Bonita.pfb` to your local  $\TeX$  tree:

```
TEXMF:/fonts/type1/softmakerfreefont/Bonita/
```

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
6bo	m	n	Bonita	OT1, T1, TS1
6bo	m	sl	Bonita	OT1, T1, TS1
6bo	m	sc	BONITA	OT1, T1, TS1

### 1.3 Installation

The following steps will show you the installation in the case of *MiKTeX*. For another  $\TeX$  distribution please take a look in its documentation.

- get `bonita.tds.zip`
- extract it in the main directory of your local  $\TeX$  tree
- update the `FileNameDataBase (FNDB)` in *MiKTeX* Settings or with `initexmf -u1` on the command line
- include the map file
  - run `initexmf --edit-config-file updmap`
  - add `Map bonita.map` in the opening editor

<sup>1</sup>for system-wide installations you have to add the `--admin` switch

- *save the file and close the editor*
- *run* `initexmf --mkmaps`

#### *1.4 Usage*

*If you want to typeset your complete document with the font Bonita simply add `\usepackage{bonita}` to your preamble. If not, simply add another font package after `\usepackage{bonita}`. You can switch to the font Bonita with the command `\FFBonita`, which is a shortcut for:*

```
\fontfamily{6bo}\fontseries{m}\fontshape{n}\selectfont
```
