

# The `simpleicons` package

## High quality icons for popular brands

Simple Icons (Font)  
Inesh Bose ( $\text{\LaTeX}$  package)

13.21.0 – December 20, 2024

This package provides  $\text{\LaTeX}$  support for the Simple Icons logos. To use Simple Icons in your document, include the package with `\usepackage{simpleicons}`. An icon can be accessed using the icon name (one word, lowercase). To do this, you can use `\simpleicon{thebrandname}`. A list of all included icons with their respective commands can be found at the end of this document.

### Example

```
...
\usepackage{simpleicons}
...
\begin{document}
...
\simpleicon{github}
...
\end{document}
```

Result: 

### Bugs

For bug reports and feature requests, report on the GitHub repository <https://github.com/ineshbose/simple-icons-latex>.

If you get an error "dfTeX error: pdflatex: Font at 600 not found", add `\pdfmapfile{+simpleicons.map}` in the preamble.

## List of icons

| Icon        | Name            | Direct command               |
|-------------|-----------------|------------------------------|
| ?           | 1001tracklists  | \simpleicon{1001tracklists}  |
