

CURLINFO_CONTENT_LENGTH_DOWNLOAD(3) curl_easy_getinfo(3) CURLINFO_CONTENT_LENGTH_DOWNLOAD(3)

NAME

CURLINFO_CONTENT_LENGTH_DOWNLOAD – get content-length of download

SYNOPSIS

```
#include <curl/curl.h>
```

```
CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_CONTENT_LENGTH_DOWNLOAD,  
                           double *content_length);
```

DESCRIPTION

Pass a pointer to a double to receive the content-length of the download. This is the value read from the Content-Length: field. Since 7.19.4, this returns -1 if the size isn't known.

PROTOCOLS

HTTP(S)

EXAMPLE

TODO

AVAILABILITY

Added in 7.6.1

RETURN VALUE

Returns CURLE_OK if the option is supported, and CURLE_UNKNOWN_OPTION if not.
